5. Deployment Verification

Backend Verification Checklist

The screenshot displays the ReWear service dashboard on the Render platform. The interface includes a sidebar with navigation options like Dashboard, ReWear, Events, Settings, and various monitoring and management tools. The main content area shows the service status as 'Free' with an option to 'Upgrade your instance'. It lists the service ID, the user 'nuwanakanadi / demo', and the main branch. A warning banner indicates that the free instance will spin down with inactivity. Below this, a list of deployment events is shown, including successful live deployments and failed attempts with rollback options.

6. Deployment Issues Encountered and Solutions

Issue 1

- **Problem:** Email service did not work when the deployment is done.
- **Solution:** Use the brevo render supportive method to solve that problem

7. Successful Deployed Evidence
